

Key Advantages

- **Safety safety and safety:** Our highly trained staff and digital safety measures will lower the risk of any accident which would damage the pipes, the workers or contaminate the product. Examples:

- Wrong acid-base concentration.
- Wrong pressure or temperature.
- Wrong duration of the procedure.

- **Digitalization:** Automatic reports fed with data from the sensors of the machine.

- **Monitoring + Cloud:** Implementing of a system where we sample the values of the sensors contentiously and we send them to a device connected through the internet which will display them. This is useful for:

- Real time monitoring of the process to detect a failure as early as possible.
- Over time the performance of the machine could vary. Obtaining this data would allows us to quantify it and determine when something is going wrong.

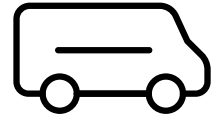

- **Maintenance:** By renting our machine it will implies full service maintenance during the period.

- **Free acid:** By renting our machine all needs of acid regarding to the cleaning progress will be included within the service.

- **Mobility:** Our machine fits through a standard door which allows it to access most of the valves in your company.

- **Short-Response time:** Due to the lower dimensions of the machine, the time to load it and take it to your company is short if you need a onetime cleaning operation.
